Grants:

Red = Ending / Recently Closed; **Orange** = Pending Proposal; **Green** = New / Recently Awarded;
Blue = Existing Award; **Purple** = OTHER/MISC.

MISGP FY2016: WRISC Strategic Management Plan Project – FROZEN

Formal extension was awarded until May of 2020. The revised budget allocated approximately \$18,000 towards the Children's Museum in Iron Mountain and for WRISC to contribute several exhibits. The rest is being utilized for WRISC equipment and wages at this time. The State requested all money be spent or the remaining amount will be subtracted from our current core funding award from MISGP.

WE Energies MEF Expanding Community, Capacity, and Collaboration for Invasive Control

This project focuses on developing volunteer opportunities, increased funding for our Strike Team, and puts some special project efforts towards Purple Loosestrife (a priority for WE Energies).

The volunteer platform is ready to be launched and this will be promoted heavily for the coming year. This fund allows for treatment of priority species throughout the entire watershed/WRISC area and is valuable funding for our Strike Team. Staff have begun some field work for the season.

GLRI-EPA-ISC: Menominee River Watershed – Invasive Species Detection & Control

Extension approved – December 30, 2020

The vDASH will be utilized on Barrens Lake in the Spread Eagle Barrens as once the permit is approved and that will serve as our full test run of the unit. As far as other deliverables are concerned, there is some more trail surveying to be done next season but treatment acreage is on track. The ROV will also be utilized to conduct inland lake surveys now that a generator has been purchased.

GLRI – Boat Wash

[WRISC Boatwash FY19: WRISC Boatwash Program](#)

Awarded! \$36,000; Contract signed August 20, 2019

Deliverables: 3,000 boater contacts

Received contract documents for budget and project work plan. Will begin pulling money from this grant in 2020. Restrictions on the CBCW programs are lifting soon and we have received guidance on how to carefully conduct watercraft inspections. We may produce an online training video for lake groups and others wanting to be trained on new guidance.

WRISC Boatwash FY20: WRISC Boatwash

Awarded! \$39,000;

Deliverables: 3,000 boater contacts

Have submitted Operating and Financial Plans

UP Multi-CISMA HWA Survey Project (MISGP, Administered by Alger CD) - FROZEN

Conducted several HWA surveys on private properties in Menominee CO. No HWA has been detected thus far. With the spring season fast upon us, it is unlikely we will conduct any more surveys this season. More will occur this coming Fall/Winter 2020.

Life After Phragmites: Wetland Restoration & Landowner Stewardship (MISGP, Administered by UP RC&D) - FROZEN

This project is a very similar continuation to what we've already been doing in MI for Phragmites. Again, most UP CISMAs are partnered on this project for their respective management areas. The goal is to continue implementing the successful Cost Share program. WRISC will be responsible for about 15 acres of cost share phragmites treatment each year of the project as well as various outreach efforts. An initial planning meeting for 2020 season took place and some sites were identified for treatment. The Subaward was also adjusted to reflect actual expenses so far and some predicted reduction in the coming year.

Life After Phragmites: Wetland Restoration & Landowner Stewardship in Michigan's UP and Northeastern Wisconsin – (SOGL Fund; Administered by UP RC&D)

WRISC has partnered on this project proposal with UP RC&D, WI DNR, and other area stakeholders. UP RC&D has discussed project adjustments with SOGL grantors and we are moving forward with this project for 2020. Cost share site visit mailings have been sent out to over 100 targeted sites throughout WRISC's counties.

Lose the Loosestrife: Purple Loosestrife Management along the Michigamme River

- Joint project with WePIC, Lake 2 Lake CISMA, WRISC, and respective CDs.
- \$253,465 over 5 years

This project will help fund efforts to remove and manage purple loosestrife infestations along approximately 26 miles of the Michigamme River from the dam in Republic to the Way Dam reservoir. Project planning meetings took place in March and sub-awards were sent to project partners. COVID-19 has disrupted planning for this project, but we are hoping to get this back on track and work going in July/August.

MISGP Core Funding: Seeking Sustainability through CISMA Balance - FROZEN

- AWARDED! \$70,000; Match: \$36,500; Total Request: \$106,500

WRISC seeks to balance operational capacity by dedicating staff to each focused CISMA aspect, like daily operation, outreach, and management of terrestrial and aquatic invasives. Secure staffing and specific goals will allow WRISC to adapt to meet the needs of and provide relevant services to our local communities.

AWARDED! USFS-GLRI-CWMA: Enhancing Ecosystems of the MRW through Invasive Species

Detection, Education, & Control

Request: \$40,000 Match: \$30,800 Proposal submitted January 9, 2020

Should be notified around April 2020

WRISC proposes efforts to inventory high-traffic recreational areas, mainly off-road trails & public accesses, & determine current distributions of & control several priority IS, like Buckthorn, Eurasian Watermilfoil, etc, which threaten recreational opportunities. WRISC seeks to empower local communities to engage in IS management by offering trainings to landowners & workdays for students. Efforts effectively build on WRISC's momentum throughout the area, allowing for continued benefit to the Menominee River Watershed & its natural communities. This project is just getting underway.

AWARDED! USFS Template 7a: Pathway Education: Pathway Publicity - Raising Awareness through Media Outreach

Request: \$23,000 Proposal submitted January 31, 2020

The goal of this outreach campaign will be to raise awareness of pathways and prevention of invasive species in a "call to action" effort. This project has not started yet and we may delay efforts until next year so they are more effective, as outreach is difficult at this time.

Sustain Our Great Lakes (SOGL) Category 5 Proposal: WDNR Natural Area Buffer Project - Partnered

WDNR seeks to utilize CISMA partnerships to enhance the State's IS management efforts on state lands, by connecting with adjacent private landowners and mirroring state management on private lands to serve as a buffer. May involve funds for monitoring and some control.

WE Energies MEF 2020

Invited to submit Full Proposal, due June 15th 2020

- Submitted proposal requesting approximately \$91,000 to fund strike team efforts but also implement inland lake monitoring for AIS and provide integrated management. Project would also target private landscapes and offer invasive trade-in events and restoration efforts/education.

Misc.

Staffing: With funding freezes and cancellation of Dickinson CD's Tree Sale, WRISC decided there was too much uncertainty to hire new staff this year and instead is focused on maintaining current team members.

Newsletters/Articles: No newspaper articles have been shared during the last period. WRISC will be beginning work on a summer newsletter shortly.

Website/Facebook/Instagram: The WRISC website has been completely rebuilt and the new version is now live! Please check it out and share the website. If there are any broken links, or issues noticed on the page, please let us know. The new website is still young and there may be some issues still.

Instagram has received a few updates including running the #CISMAConnections campaign and currently has **176 followers**. Facebook received fairly consistent updates despite the shutdown, including running the #CISMAConnections campaign on this platform as well. The page has seen good reach and engagement when posts are made! The WRISC Facebook page continues to grow, having gone from **340 likes** (at the last meeting) to **347 likes** at the end of May. Total reach for our Facebook page for the past two months has been alright, but dropped off in March due to shutdowns and lack of updates. Overall, page activity **reached a total of 5,011 people**. While the page generally sees great reach whenever something is posted, a list of posts from the last period, with reach and engagement numbers, is included:
