

**KEY**

Action Category	Definition
A*	Early Detection, not yet found in this county
A*1	Early Detection; small number of database reports requiring ground truthing
A	Early Detection, limited distribution
B	Medium to high threat; mostly local, limited distributions; designate areas for eradication, suppression, containment; may choose to control based on management goals or site-specific situations
C	Low to high threat; widespread; landowner primarily takes action, CISMA advises on management strategies; may choose to control based on management goals or site-specific situations
Listing Status – WI NR40	Definition
P	Prohibited - With certain exceptions, the transport, possession, transfer and introduction of prohibited species is banned.
R	Restricted - Restricted species are subject to a ban on transport, transfer and introduction, but possession is allowed, except for fish and crayfish.
Listing Status – MI Part 413	Definition
P	Prohibited - it is unlawful to possess, introduce, import, sell or offer that species for sale as a live organism, except under certain circumstances. <i>Used for species that are not widely distributed in the state</i>
R	Restricted - it is unlawful to possess, introduce, import, sell or offer that species for sale as a live organism, except under certain circumstances. <i>Applied to species that are established in the state</i>
WL	Watch List - Invasive species on the watch list have been identified as posing an immediate or potential threat to Michigan's economy, environment, or human health. These species either have never been confirmed in the wild in Michigan or have a limited known distribution.

**Tier 1 - Prevention** (any high priority/prohibited/watch list NOT currently present in WRISC area)
